SUMMARY

Software Engineering student with a CGPA of 3.45 and a strong interest in Artificial Intelligence, Machine Learning, UI/UX Design, and Full-Stack Development. Experienced in developing machine learning models, database-driven applications, and interactive user interfaces through academic and internship projects. Proficient in Python, SQL, Scikit-learn, and modern development tools, with a focus on building practical and efficient software solutions.

EDUCATION

Bachelor of Science in Software Engineering

2023 – Present

Fatima Jinnah Women University, Rawalpindi

CGPA: 3.45 Expected Graduation: 2027

Intermediate (Pre-Engineering)

2021 – 2023

Punjab College, Gujar Khan

Grade: A+

Matriculation (Biology)

2019 – 2021

CHSS Daultala

Grade: A+

SKILLS

Programming Languages: Python, C++, SQL, HTML, CSS, JavaScript, PHP

AI / Machine Learning: Machine Learning, Data Preprocessing, Predictive Modeling, Scikit-learn, Pandas, NumPy, Data Visualization

Web Development: Frontend Development, Backend Integration, Database Systems

Design Tools: Figma, Canva, Adobe XD

Tools & Technologies: Git, GitHub, MySQL, XAMPP, VS Code, Google Colab, LaTeX

Soft Skills: Problem Solving, Technical Documentation, Team Collaboration

INTERNSHIP

AI/ML Engineering Intern

2026

DevelopersHub Corporation

- Completed hands-on AI/ML tasks involving data preprocessing, model training, and evaluation using real-world datasets.
- Performed exploratory data analysis using Pandas and visualized trends with Matplotlib and Seaborn.
- Developed regression and classification models for stock price and heart disease prediction.
- Worked with APIs such as yfinance for real-time data extraction and analysis.

PROJECTS

EcoSWAp – Sustainable Item Exchange Platform <i>HTML, CSS, Bootstrap, JavaScript, PHP, MySQL, XAMPP</i> • Developed a full-stack web platform enabling users to exchange reusable items and promote sustainability. • Designed a responsive user interface using Bootstrap and JavaScript. • Implemented backend functionality using PHP and MySQL for secure data management.	2026
Hospital Appointment Booking System <i>Java, HTML, CSS</i> • Developed a patient appointment scheduling and management system. • Designed the frontend using HTML and CSS and implemented backend functionality in Java.	2025
Loan Default & Chronic Kidney Disease Prediction <i>Python, Scikit-learn, Machine Learning</i> • Built machine learning models to predict financial and healthcare risks. • Performed data cleaning, encoding, feature selection, and model evaluation. • Assessed model performance using standard classification metrics.	2026
Credit Card Fraud Detection System <i>SQL, Database Systems</i> • Designed a relational database system for fraud detection and transaction analysis. • Developed optimized SQL queries for reporting and data retrieval.	2025
Cinema Ticket Booking System <i>C++</i> • Developed a console-based application for ticket booking and seat management.	2024
UI/UX Design Projects <i>Figma, Adobe XD</i> • Designed interfaces for Coffee Shop, Weather App, and E-Commerce platforms. • Created wireframes and interactive prototypes focusing on usability and user experience.	2026

COURSES & SELF-STUDY

Python Programming • Completed structured learning in Python programming including functions, object-oriented programming, file handling, and data structures. • Applied Python concepts extensively in machine learning, automation, and academic projects.	2025
---	-------------

CERTIFICATIONS

Generative AI Google • Completed training in Generative AI, Large Language Models (LLMs), prompt engineering, and responsible AI practices. • Explored practical AI applications for content generation, problem solving, and productivity enhancement. • Gained understanding of modern AI workflows and emerging trends in generative technologies.	2026
---	-------------
